

Manato Ohara, diagnosed with type 1 diabetes
Kanagawa, Japan

novo nordisk – a focused healthcare company

Conference call

Semaglutide FDA Advisory
Committee Meeting

19 October 2017

Forward-looking statements

Novo Nordisk's reports filed with or furnished to the US Securities and Exchange Commission (SEC), including the company's Annual Report 2016 and Form 20-F, which are both filed with the SEC in February 2017 in continuation of the publication of the Annual Report 2016, and written information released, or oral statements made, to the public in the future by or on behalf of Novo Nordisk, may contain forward-looking statements. Words such as 'believe', 'expect', 'may', 'will', 'plan', 'strategy', 'prospect', 'foresee', 'estimate', 'project', 'anticipate', 'can', 'intend', 'target' and other words and terms of similar meaning in connection with any discussion of future operating or financial performance identify forward-looking statements. Examples of such forward-looking statements include, but are not limited to:

- Statements of targets, plans, objectives or goals for future operations, including those related to Novo Nordisk's products, product research, product development, product introductions and product approvals as well as cooperation in relation thereto
- Statements containing projections of or targets for revenues, costs, income (or loss), earnings per share, capital expenditures, dividends, capital structure, net financials and other financial measures
- Statements regarding future economic performance, future actions and outcome of contingencies such as legal proceedings, and
- Statements regarding the assumptions underlying or relating to such statements.

These statements are based on current plans, estimates and projections. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific. Novo Nordisk cautions that a number of important factors, including those described in this presentation, could cause actual results to differ materially from those contemplated in any forward-looking statements.

Factors that may affect future results include, but are not limited to, global as well as local political and economic conditions, including interest rate and currency exchange rate fluctuations, delay or failure of projects related to research and/or development, unplanned loss of patents, interruptions of supplies and production, product recall, unexpected contract breaches or terminations, government-mandated or market-driven price decreases for Novo Nordisk's products, introduction of competing products, reliance on information technology, Novo Nordisk's ability to successfully market current and new products, exposure to product liability and legal proceedings and investigations, changes in governmental laws and related interpretation thereof, including on reimbursement, intellectual property protection and regulatory controls on testing, approval, manufacturing and marketing, perceived or actual failure to adhere to ethical marketing practices, investments in and divestitures of domestic and foreign companies, unexpected growth in costs and expenses, failure to recruit and retain the right employees, and failure to maintain a culture of compliance.

Please also refer to the overview of risk factors in 'Risk Management' on pp 40-43 of the Annual Report 2016.

Unless required by law, Novo Nordisk is under no duty and undertakes no obligation to update or revise any forward-looking statement after the distribution of this presentation, whether as a result of new information, future events or otherwise.

Important drug information

- Victoza® (liraglutide 1.2 mg & 1.8 mg) is approved for the management of type 2 diabetes only
- Saxenda® (liraglutide 3 mg) is approved in the US and EU for the treatment of obesity only

On 18 October 2017 the FDA Advisory Committee discussed the New Drug Application for once-weekly semaglutide

Key milestones for once-weekly semaglutide

16-0 vote in favour of the approval of semaglutide to improve glycaemic control in adults with type 2 diabetes

Primary discussion points from FDA Advisory Committee meeting

Glycaemic control

- Efficacy of semaglutide in improving glycaemic control in adults with type 2 diabetes

General safety

- General consistency of safety profile compared with that of other approved GLP-1 receptor agonists

Diabetic retinopathy

- Considerations pertaining to the secondary safety endpoint of diabetic retinopathy in the SUSTAIN 6 trial

Cardiovascular safety and risk reduction

- Adequacy of SUSTAIN 6 data in characterising the cardiovascular safety of semaglutide

Result of Advisory Committee votes and regulatory status

Outcome of Advisory Committee meeting and next steps:

- The Advisory Committee voted 16-0 in favour of the approval of once-weekly semaglutide to improve glycaemic control in adults with type 2 diabetes. One member of the committee abstained.
- Regulatory feedback in both the US and the EU expected in Q4 2017
